August 20, 2015 5:00pm EDT - NEWS RELEASE / FOR IMMEDIATE RELEASE

ATLANTA, Georgia -- August 20, 2015 – BMC, one of the nation’s leading providers of building materials and construction services, today announced that it has signed an asset purchase agreement to acquire the operations of Atlanta, Georgia based Robert Bowden, Inc. (“RBI”), enabling BMC to expand its custom and production millwork capabilities to the southeastern United States. “Over the past 32 years, Robert Bowden has built a fine reputation for excellence for providing custom and production millwork”, said Peter Alexander, BMC’s CEO. “We are very excited about growing both companies through the combined strength of RBI and BMC, and both companies will remain focused on our customers through the combination”. Terms of the agreement were not disclosed.

“We are very proud of the history of RBI and the culture that has been created, and we’re very grateful for the customers who have honored us with their business and friendship. The alignment of cultures between these two great companies will fit the strategy of BMC and will provide scale for RBI. The transaction presents great opportunities for future growth and prosperity.” said Nick Massengill, President of RBI.

ABOUT BMC

BMC, headquartered in Atlanta, Georgia, is a leading provider of building products and construction services to professional builders and contractors across the United States. The Company currently has 38 lumber yards, 18 truss manufacturing facilities, 23 millwork operations, and 8 showrooms and design centers in eleven of the top 25 single family construction markets.

ABOUT RBI

Robert Bowden, Inc. was founded in 1983 and became employee owned in 2001. The company operates branch distribution centers in Marietta, Duluth and McDonough, Georgia, as well as a manufacturing operation in Marietta. RBI employs approximately 300 people, and is best known for supplying windows, doors, trim, millwork, cornice, siding, stair parts and decking to the professional customers through its 3 manufacturing and distribution centers.
