Cascade Wood Announces the Ultimate Door Frame Protection for Homes

White City OR – Cascade Wood Products, Inc., based in White City Oregon, announced that it is expanding the Frame Defense™ brand of limited lifetime warranty door frames to include Poly-Classic® Frame Defense™.

Poly-Classic® Frame Defense™ door frames, brick mould, and mull posts utilize Poly-Classic® material, which is finger jointed to the bottom sill end of our Frame Defense™ products where door frames are most vulnerable. Poly-Classic® material will not absorb water, preventing rot and decay.

Poly-Classic® Frame Defense™ products cut, machine, and receive fasteners just like wood so that no special tools are required for installation. All of our Poly-Classic® door frames are primed with a high-quality acrylic primer along with a blue Poly-Classic limited lifetime warranty stamp so you can be sure you're getting the best product.

Materials used for Poly-Classic® Frame Defense™ are manufactured by Cascade Wood Products, Inc. and are made in America. Cascade Wood Products has produced Poly-Classic® limited lifetime warranty window parts for over twenty years and now brings the rot-free, wood-like material to exterior door frame products.

About us: Cascade Wood Products, Inc. is a full line domestic millwork manufacturer with the ability to make both traditional and custom millwork products in pine, hem-fir, knotty alder and our Poly-Classic® material. All Frame Defense™ products come with a limited lifetime warranty and include PVC, extrusion, pultrusion, centrifugal casting and injection moulding. Learn more at <http://www.cascadewood.com>
