

Attention: Directors and Managers of Workplace Safety

2018 Millwork Safety Survey

Coming March 30th!

One of the major challenges facing the industry workplace is millwork safety. In November 2017, according to the Bureau of Labor Statistics report, approximately 2.9 million nonfatal workplace injuries were reported by private industry employers in 2016.

In trying to improve workplace safety protocol, employers and safety managers are continually looking for safety benchmarks and best practices. The **2017 WMA Millwork Safety Survey Study** is the first for the millwork industry to focus on millwork safety trends and provide health and safety resources.

WMA invites you to participate in its WMA Millwork Safety Survey. Your participation will ensure a comprehensive report.

The value of the report summary for your company is threefold:

1. The report will help your company determine how your company compares with other employers in the millwork industry when it comes to current health and safety trend data identified in the survey.
2. The report information helps Safety Managers re-exam their company's safety program and improve policies and procedures by identifying potential strength and weaknesses within their own program.
3. The data helps WMA's Safety Committee protect your interests by identifying safety trends and providing resources and programs that aide in workplace safety.

What's New for 2017?

- WMA will partner with OSHA in an alliance and develop goals and objectives for a safety program that is tailored to meet the needs of the millwork industry. (<https://www.osha.gov/dcsp/alliances/whatis.html>)
- This is a first for our industry; focusing on millwork safety trends by benchmarking health and safety in the workplace.
- WMA will be providing members the tools and resources needed to improve worker safety.
- WMA members who complete the survey receive a **free** summary report of the survey findings.

Complete the Survey

Access the 2018 WMA Millwork Safety survey link at: [www. WorldMillworkAlliance.com](http://www.WorldMillworkAlliance.com).

Survey deadline is April 30, 2018.

WMA members who complete the survey receive a **FREE** summary report of the survey findings

The Millwork Survey Report cost non-participant members is \$50; non-member participants may purchase the report for \$150; and the non-member non-participant report is \$350.
